

Requirement Gathering Report Employee Performance Tracking System

Project Name	Employee Performance Tracking System
Prepared By	Anwarali Mulla
Faculty / Guide	IT Manager
College Name	Vijaybhoomi University
Application Type	Web Application
Project Timeline	5 Weeks

1. Problem Statement

Organizations face difficulty in tracking employee work progress across departments. The absence of a centralized system creates poor visibility into assigned, completed, and remaining work. This project aims to develop a web-based Employee Performance Tracking System to improve monitoring, reporting, and performance evaluation for HR and managers.

2. Main Users of the System

The system will mainly support HR and Managers. Employees and other staff members may also use the system for viewing tasks and updating work progress.

3. Core Features Required

- Task assignment and tracking
- Assigned vs Completed vs Remaining dashboard
- Employee performance reports
- Task status updates
- Work summary and analytics
- Department-wise monitoring

4. Application Scope

This project will be developed as a web application. The system will focus on centralized employee task tracking and performance monitoring for organizations.

5. Functional Requirements

- Managers should be able to assign tasks.
- Employees should be able to update task status.
- HR should be able to monitor performance.
- The system should generate reports.
- Dashboard should show assigned, completed, and pending work.

6. Non-Functional Requirements

- Secure login system
- Responsive web interface
- Easy-to-use UI
- Fast loading dashboard
- Data privacy and role-based access

7. Technology Stack

Technology stack is currently not finalized. It will be selected during the design and development phase.

8. Constraints

- Project timeline is limited to 5 weeks.
- Notification methods are not finalized.
- Login roles and permissions are still under discussion.

9. Future Enhancements

- Notification system
- Advanced analytics
- Mobile application support
- Attendance and leave integration
